## International Explosives Equipment Warranty Statement

1. International Explosives Equipment (IEE) warrants to the original retail customer: that every new piece of equipment supplied by IEE or an authorized distributor of IEE, purchased by such customer and properly installed in an application, will be free from defects in material and workmanship under normal use and service. If, during the warranty period following the delivery of the equipment it is shown there is a defect in material or workmanship caused solely by IEE's failure to meet such standards, and customer has promptly notified IEE in writing of such defect within that period, IEE shall repair or replace, at IEE's cost and option, such defective equipment or part.

Such repair or replacement will be made without charge to the customer providing the repair is carried out at an IEE workshop location. Any part or equipment that is determined by the original purchaser to be defective must be delivered to IEE location with all freight to and from this location at the cost of the customer.

Where the warranty repair needs to be carried out at the customer's premises, then the customer will need to cover but not limited to travel labour, airfares and other modes of transport, accommodation and messing and freight for components to and from these premises. Any inductions or any other costs required to attend the customer's site or stand by time during the warranty repair will be invoiced at IEE agreed hourly rate. All equipment or part that are replaced shall become the property of IEE. Any repaired or replaced equipment or part shall be warranted until the expiration of the original warranty period. IEE's warranty obligations are expressly conditioned on the customer fulfilling all of his obligations pursuant to his purchase order, including, without limitation, his payment obligations.
